Company History

2009

Riotouch was Founded

2010-2013

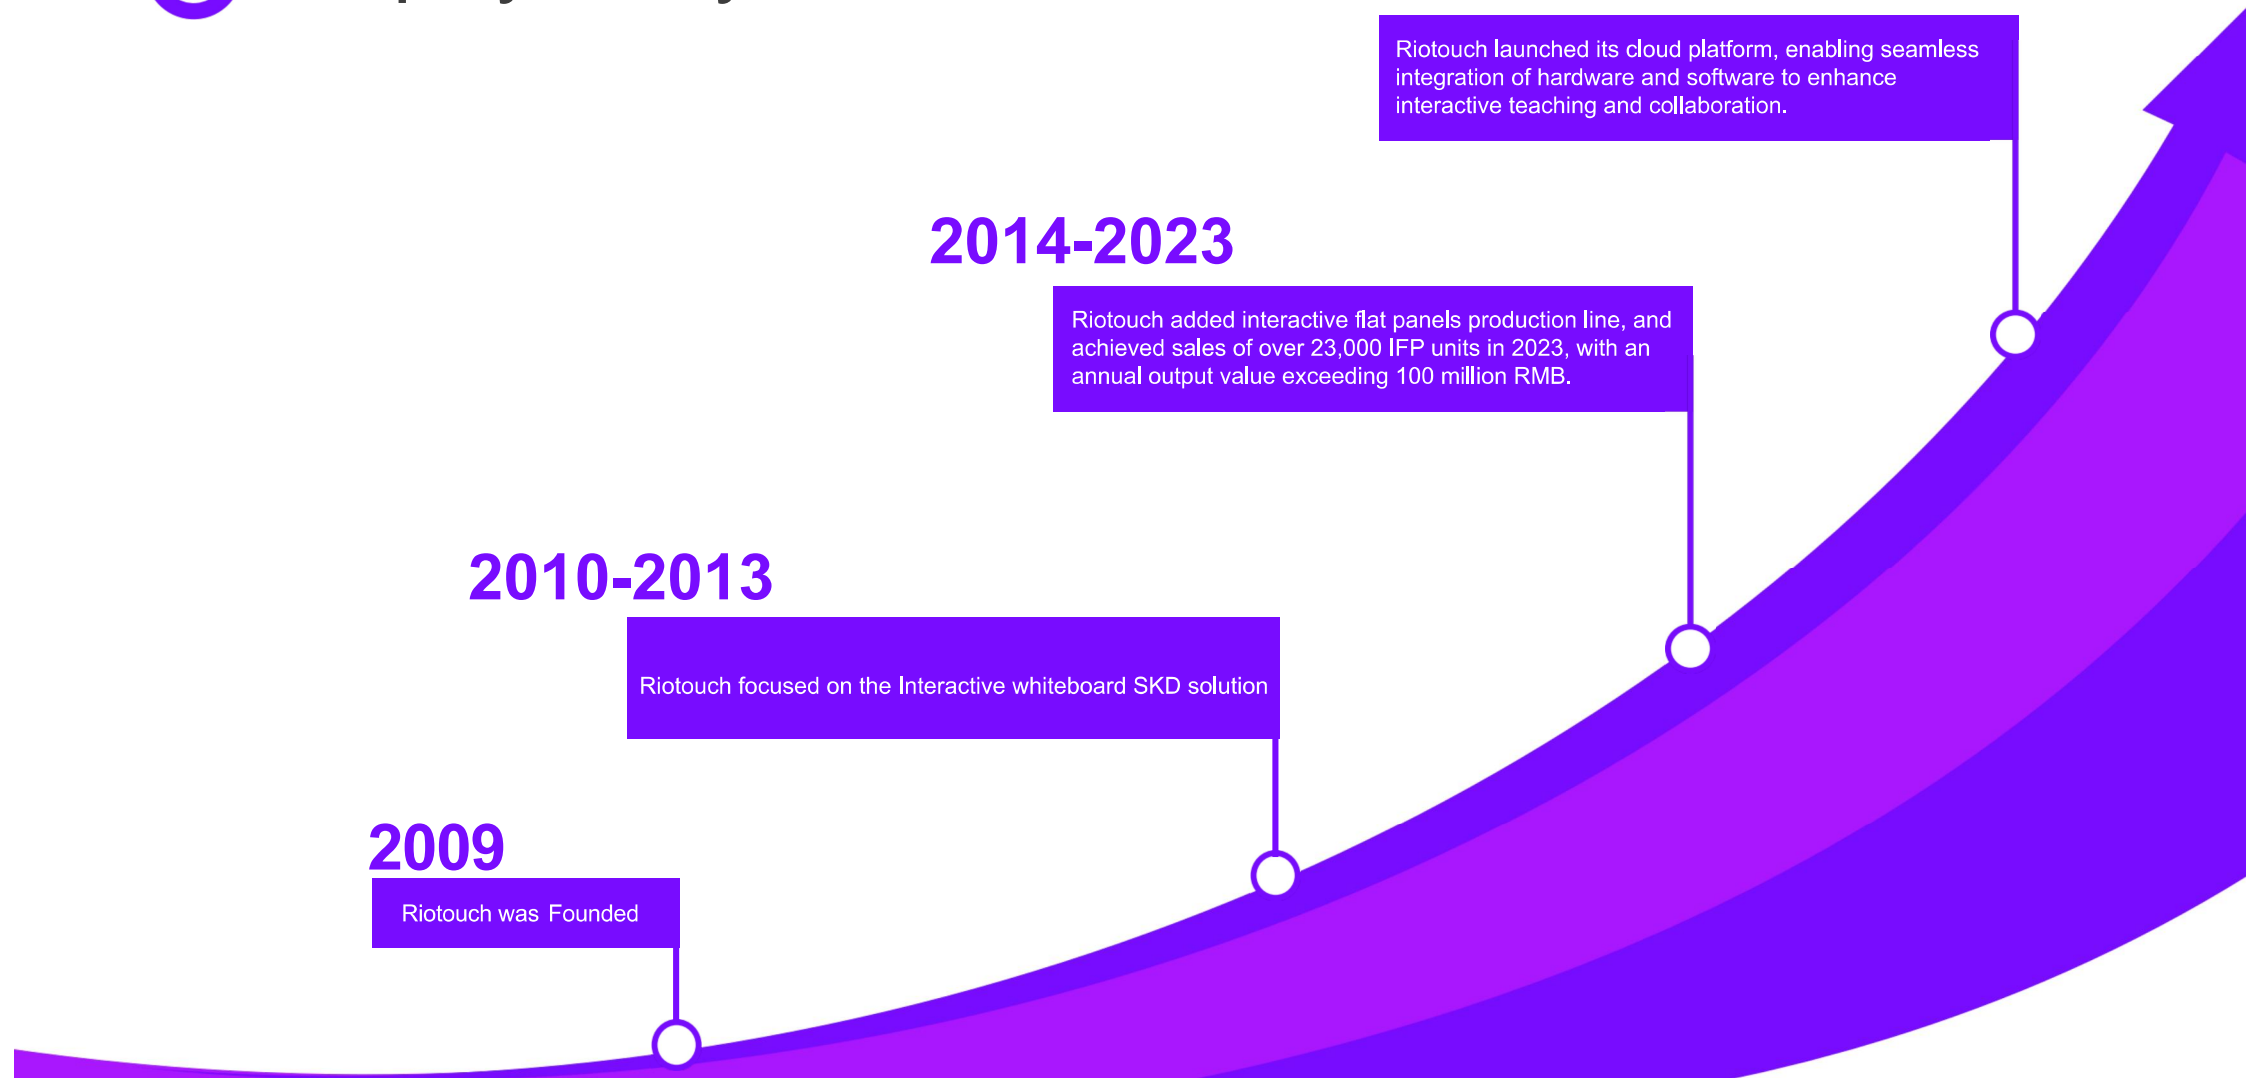

Riotouch focused on the Interactive whiteboard SKD solution

2014-2023

Riotouch added interactive flat panels production line, and achieved sales of over 23,000 IFP units in 2023, with an annual output value exceeding 100 million RMB.

2024

Riotouch launched its cloud platform, enabling seamless integration of hardware and software to enhance interactive teaching and collaboration.

Generative Educational AI

- Different grades
- Different difficulties
- Different types of questions
- Multiple questions

The interface displays a math problem and its solution. The problem is: "The function $y = 2\sin(x) + 1$, when $x \in [0, 2\pi]$, the number of solutions of the equation $y = 2$ is ()". The solution is: "The equation you provided is: $y = 2\sin(x) + 1$. This is a **sinusoidal function**, specifically a transformation of the basic sine function $y = \sin(x)$. Let's break it down and analyze its properties: Key Features of $y = 2\sin(x) + 1$: 1. **Amplitude:** The amplitude is the coefficient of the sine function, which determines the height of the wave. In this case, the amplitude is 2, meaning the graph oscillates 2 units above and below its midline. 2. **Midline (Vertical Shift):** The midline is the horizontal line that the function oscillates around. In this case, the midline is $y = 1$. To find the number of solutions of the equation $y = 2$, we set $2\sin(x) + 1 = 2$, which simplifies to $2\sin(x) = 1$, or $\sin(x) = \frac{1}{2}$. In the interval $[0, 2\pi]$, the sine function equals $\frac{1}{2}$ at $x = \frac{\pi}{6}$ and $x = \frac{5\pi}{6}$. Therefore, there are 2 solutions." The interface also includes a sidebar with filters for Subject (Maths), Level (Skilled), Grade (8), Language (English), Quantity (1), and Question type (Question type). A 'Generate' button is present. The bottom toolbar includes icons for Undo, New, Eraser, Pen, Select, Insert, Excel, Upload, Shape, Redo, Screenshot, Document Scanner, Comment, and Tool.

$y = 2\sin(x) + 1$

36px

1 / 1 Single - choice question

The following is a single - choice question for you:

The function $y = 2\sin(x) + 1$, when $x \in [0, 2\pi]$, the number of solutions of the equation $y = 2$ is ()

A. 1
B. 2
C. 3

Mathematical Formulas

$y=2\sin(x)+1$

The equation $Y = 2\sin(x) + 1$ represents a **transformed sine function**. Let's break it down step by step to understand its components and behavior:

1. Basic Sine Function

The basic sine function is:

$$Y = \sin(x)$$

- It oscillates between -1 and 1 .
- It has a period of 2π (repeats every 2π units).

Chemical Formulas

$C_8H_{11}NO_2$

Structure of Dopamine:

- Molecular Structure:**
 - Dopamine is an organic compound belonging to the **catecholamine** family.
 - It consists of a **benzene ring** (C_6H_4) with two hydroxyl groups ($-OH$) at the 1 and 2 positions (making it a **catechol** structure).
 - Attached to the benzene ring is an **ethylamine side chain** ($-CH_2-CH_2-NH_2$).
- Structural Formula:**

PHET Resource Integration

Black-body radiation refers to the electromagnetic radiation emitted by an idealized object known as a **black body**. A black body is a theoretical construct that absorbs all incident electromagnetic radiation, regardless of wavelength or angle of incidence, and emits radiation in a characteristic spectrum that depends only on its temperature.

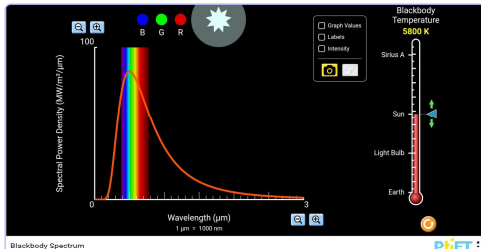

Key Concepts:

1. **Black Body:**
 - A perfect absorber and emitter of radiation.
 - Does not reflect or transmit any radiation.

DeepSeek Google Function graph QA

Black-body radiation

Black - body radiation refers to the electromagnetic radiation emitted by a black body in a state of thermodynamic equilibrium. The electromagnetic spectrum of black - body radiation depends only on the temperature of the black body. On the other hand, black - body radiation is a phenomenon that occurs when light and matter reach equilibrium. Since the matter is in equilibrium, its state can be described by a temperature. M-

Blackbody Spectrum

3D Educational Resource Integration

Earth is the third planet from the Sun and the only known astronomical object to support life. It is often referred to as the "Blue Planet" due to its abundant water, which covers about 71% of its surface. Earth is unique in its ability to sustain a diverse range of life forms, including humans, animals, plants, and microorganisms.

Key Facts About Earth:

Message DeepSeek

DeepSeek Google Function graph QA

Earth

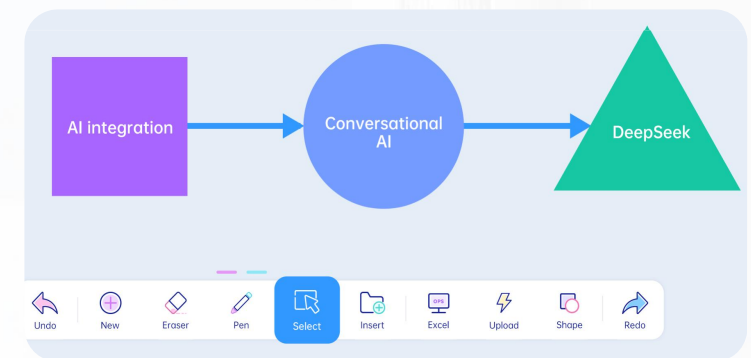

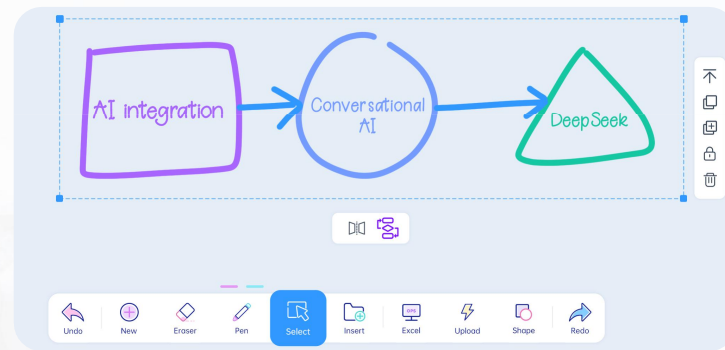

The Earth is the third - farthest planet from the Sun and the only known celestial body to harbor life. This is because the Earth is an oceanic world, the only one in the solar system with liquid surface water. Nearly all of the water on Earth is contained in the global oceans, covering 70.8% of the Earth's crust. The remaining 29.2% of the crust is land, most of which is located on the continental landmasses in the terrestrial hemisph-
